

Understanding unlocks health

Patient Guide Solutions
premium patient
education

Partner with Patient Guide Solutions.

We have partnered with hospitals for over 30 years and understand how much the work you do matters.

Our goal is to build healthier communities by supporting you and your mission. That is why we are dedicated to providing relevant and accessible health information to improve your patients' experience and outcomes.

When you partner with Patient Guide Solutions, you gain a team of medical and design professionals to help you deliver the information your patients need when they need it the most.

The solution:

Our standard Patient Information Guide is optimized by our medical team to cover the most common reasons for hospital admission.

Don't spend any more time developing patient education. Let us plan, write, design, produce, and update it for you.

What to expect:

- Guaranteed medical accuracy.
- Available in various languages and formats.
- Cost effective.
- Pocket covers allowing you to include supplemental materials.

The standard Patient Information Guides are in stock and ready to ship today.

Need more options?

The benefits to using our guides.

- **Get premium quality.** Our materials are current, compliant and survey ready.
- **Help your nursing staff.** Support them with ready to go, bedside-focused teaching materials.
- **Help your patients.** We deliver what they need to know using patient-friendly language.
- **Save yourself work.** Make patient education one less thing on your to-do list. We take care of it all.
- **Reach more patients.** Don't let language barriers get in the way of better health.

Bonus: Our Patient Resource Library opens a world of information beyond print.

The diagram illustrates the digital transformation of patient education. It starts with a printed page titled "Managing Diabetes" which includes a QR code for "Blood Sugar Complications". This QR code is scanned by a smartphone, which then displays the app interface. The app interface shows the same QR code and title, and then transitions to a screen with the title "Blood Sugar Complications" and "What to Do When Blood Sugar Gets Dangerous".

We follow the recommendations of these leading professional societies:

American Heart Association
